

PSX系列

废钢破碎生产流水线
Scrap Crushing Production Line

产品概述 Applications

PSX系列废钢破碎生产流水线，适用于加工报废汽车车体，马口铁类，旧家电，自行车、空罐等下等废料是指成为上级的制钢原料。通过本机不断粉碎，出去涂膜，提高体积比重，投电炉时防止爆炸，在一定状态下提升溶解率等，满足钢厂“精料入炉”的要求。

PSX series scrap crushing production line is applicable to the processing of scrap car bodies, tinplate, old household appliances, bicycles, empty cans and other inferior scrap, which means to become the superior steel raw materials. Through the continuous pulverization of the machine, the coating is removed, the volume proportion is increased, the explosion is prevented when the furnace is put into operation, and the dissolution rate is increased under a certain state, etc., so as to meet the requirements of "fine material entering the furnace" of the steel plant.

技术参数 Technical Specifications

型号 Type	主轴规格 (mm) Spindle Specification	输送机宽度 (mm) Conveyor Width	主电机功率 (Kw) Power	产量 (T/h) Output
PSX-600HP	5055	1200	450	8-12
PSX-1200HP	6886	2000	600	20-35
PSX-1600HP	68104	2500	1200	25-40
PSX-2000HP	80104		1420	40-70
PSX-3000HP	80104		2250	50-80
PSX-4000HP	90104		3000	60-80
PSX-6000HP	98114		4500	80-120
